

December 2002

The Bay Leaf

California Native Plant Society • East Bay Chapter • Alameda & Contra Costa Counties

Calendar of Events

Plant Sale Activities

Tuesdays, December 3, 10, 17, Merritt College, 9 a.m.-noon, Propagation and Potting Sessions, p. 3

Calflora Open House

Friday, December 6, 1-3 p.m., Calflora behind the scenes tour and open house, p. 2

Book Signing

Friday, December 6 from 5 to 7 p.m. at the University and Jepson Herbaria. New Edition of **Flowering Plants and Ferns of Mount Diablo** by Barbara Ertter and Mary Bowerman, reception and book signing, p. 2

CNPS State Board and Chapter Council Meeting

Friday, December 6, Saturday, December 7 and

Sunday, December 8. See page 2 for schedule of activities.

Native Here Nursery

Fridays, December 6, 13, 20, 27, 9 to noon

Saturdays, December 7, 14, 21, 28, 10 to 1. Native Here Nursery open for business, p.3

Sunday, December 22, 1 p.m. Sow seeds at Mitchell Canyon entrance, Mount Diablo State Park, p. 3

Field Trips

Sunday, December 8, 10 a.m. field trip to Rock City area of Mount Diablo State Park, p. 6

Saturday, December 14, 10 a.m. field trip to Huckleberry Regional Park, p. 6

Ballot for Year 2003 Elected Officers

The nominating committee presents the following slate of officers for the CNPS East Bay Chapter for the year 2003:

2003 Ballot

President: **Tony Morosco**

Vice President:

Treasurer: **Holly Forbes**

Recording Secretary: **Laura Baker**

Corresponding Secretary:

Although voting in an uncontested election may not seem necessary, an election is required by our bylaws. Please vote as an expression of confidence in those who are willing to serve as volunteer officers in our organization.

Please send your ballot to CNPS, P.O. Box 5597, Elmwood Station, Berkeley, CA 94705 or bring it to the January Board meeting.

The chapter board is also seeking chairpersons for a number of committees. Presently open are book sales, education, an alternate newsletter editor, and poster sales. Other chairpersons may welcome assistance. If you are interested in finding out more about the chapter board, please feel free to attend a board meeting, phone or e-mail the chapter officers, or Charli Danielsen, nominations committee chair, charlid@pacbell.net.

State CNPS Chapter Council Meeting

CNPS December Board Meeting and Chapter Council Meetings held on December 6, 7 and 8 at the UC Berkeley Faculty Club.

Please contact Charli Danielson (510) 525-9076, charlid@pacbell.net if you are willing to house CNPS guests for Friday and/or Saturday night.

Friday, December 6, 1 - 3 p.m. **Calflora “behind the scenes” tour and open house**, Calflora Office, 937 San Pablo in Albany.

5 - 7 p.m. **Reception and book signing event at the Jepson Herbarium**: hot off the press *Flowering Plants and Ferns of Mount Diablo* by Barbara Ertter and Mary Bowerman. “Behind the scenes” tour of the Jepson Herbarium at 5:30 pm.

7 - 9 p.m. **CNPS State Board Meeting**

Saturday December 7, 9 a.m. - 5 p.m. **CNPS Chapter Council Meeting**

5 p.m. - 6 p.m. **Sipping and socializing** at the back of Heyns room. Have something nice to drink, visit with friends and other plant enthusiasts. Check out the newly published *Flowering Plants and Ferns of Mount Diablo* and get your copy signed by the authors.

6 p.m. - 7:30 p.m. **Dinner** in the Heyns dining room, a great setting for more conversation and a pleasant meal. All members are welcome at all events. If you are interested in joining the group for dinner, check with Delia Taylor to see if space is still available. The cost for dinner is \$20.

7:30 p.m. - 8:30 p.m. Speaker: **Dr. Hugh Stafford**. Subject: *Plant Species Diversity in California Serpentine: Regional Patterns and Possible Causative Factors*

Dr. Stafford will give an overview of the natural history of serpentine (geology, soils, vegetation) as it relates to patterns of species diversity on serpentine. He will also discuss disturbance effects (grazing, burning) on serpentine vegetation and how these differ from those affecting “normal” vegetation, with a detailed look at the Sierra Nevada.

Enjoy an entertaining and informative presentation by a leading researcher in the field on one of the most important and unique plant habitats in California. Dr. Hugh Safford, a geologist-ecologist, is both Research Associate at UC Davis and Regional Ecologist for the US Forest Service.

For Sunday’s activities see **Field Trips**, p. 6

Local contact: Delia Taylor, deliataylor@mac.com, (510) 527-3912

New Edition of Classic Flora

The Jepson Herbarium and the East Bay Chapter will co-host a special reception and book-signing of the **new** *Flowering Plants and Ferns of Mount Diablo*, by Barbara Ertter and Mary L. Bowerman. Mark your calendar: Friday, **December 6**, from 5 to 7 p.m. at the University and Jepson Herbaria, 1001 Valley Life Science Building, UC Berkeley campus. A behind-the-scenes tour of the herbaria will be offered at 5:30, with information on the role of modern molecular research and an overview of the Jepson Interchange. All CNPS members (and anyone else!) are welcome to attend; RSVP to help with planning. Contact: Staci Markos, (510) 642-2465 smarkos@socrates.berkeley.edu.

Grants Committee

The East Bay Chapter Grants Committee is pleased to announce two grants. The first is a \$550 grant to CHIA, a group that is recreating native coastal prairie along the Ohlone Greenway Trail that parallels the BART tracks in Berkeley. The money is to be used for tools, potting soil, and plants from the Native Here Nursery. This project, now in its third year, aims to provide habitat for native animals and plants and to educate the public about native plants.

The Committee also made a \$1,000 grant to *Bay Nature* to support its January 2003 special supplement, “Gardening for Wildlife.”

The Committee has received expressions of thanks from the five recipients of the Chapter’s \$1,000 scholarship awards. The recipients of the 2002 scholarships are Sally Chess, Ruth Kirkpatrick, Elizabeth Zacharias, Leita Brown, and Erin McDermott. In addition, Ms. Kirkpatrick was singled out for special recognition and awarded the \$750 Myrtle Wolf scholarship.

Sandy McCoy

Nature will bear the closest inspection. She invites us to lay our eye level with her smallest leaf, and take an insect view of its plain.

Henry David Thoreau

Plant Sale Activities

If you haven't come up to the nursery since the plant sale you are missing out on leisurely shopping among a wide variety of plants, ready for planting.

We have a bonus-crop of young *Epilobium* (California Fuchsia), blooming the beginning of November. This is the upright form, 'Bowman's Hybrid'.

Erigeron arborescens (island buckwheat), a handsome gray buckwheat shrub with shaggy bark and umbels of white flowers next summer, has attained a tempting one-gallon size now.

Apache plume, dwarf ninebark, low sage, grasses, medium-height *Ceanothus*, manzanitas (ground-cover to tree-size), plus many odds and ends, all await your visit on Tuesday mornings.

Propagation/Potting Sessions:

December 3, 10, 17
9:00 a.m. to noon
Merritt College
Landscape Horticulture

Rain or shine

Working with cuttings from shrubs this month starts us on the way to next year's sale.

The volunteers are taking a 2 week break during the holidays. Sales and propagation resume January 7.

Shirley McPheeters

Membership

Good things are happening at the Ohlone Greenway project along the BART trail near the Peralta Community Garden, near Peralta Street and Hopkins in Berkeley. Mike Menning has been creating a bit of coastal prairie with California Habitat Indigenous Activists (CHIA). This group obtained appropriate coastal prairie plants from Native Here Nursery, allowed them to set seed and from this seed have grown new plants for use on the site. Every fall the old growth is removed and burned (at a safe location) and the ashes are returned to the soil. Volunteers are welcomed at monthly meetings to propagate plants and care for the site. Further along the BART trail is the newly dedicated and delightful historical mural which tells the story of this area, and some cool steel cows. For more information about the Berkeley Community Gardening Collaborative or CHIA, call Mike Menning at (510) 559-9421.

Delia Taylor

Native Here Nursery

Fridays, December 6, 13, 20, 27, 9 to noon
Saturdays, December 7, 14, 21, 28, 10 to one.
Native Here Nursery open for business.

Sunday, December 22, 1 p.m. Sow seeds at Mitchell Canyon entrance, Mount Diablo State Park

Restoration of a Native Bunchgrass and Wildflower Grassland

Work on this project at the Mitchell Canyon entrance to Mount Diablo State Park is now minimal. We will be collecting seed through spring and summer, mowing and pulling weeds, and sowing seed. This year's seeds will be sown at the site on Sunday, December 22 at 1 p.m. Plan to be there on time - this does not take long and is a pleasant gift to nature during holiday preparations.

The site is on the left of Mitchell Canyon Road as one approaches the park from Clayton Road.

Native Here Nursery

Soil problems seem to have been resolved and seedlings are starting to sprout from the 2002 seed collection. Volunteers are always welcome on Friday and Saturday mornings, as are customers.

The nursery remains open during the winter, except when heavy rain or wind makes conditions too uncomfortable or dangerous. If it's rainy, call ahead (510) 549-0211.

This is a good time to order plants you are interested in for fall 2003. It's also time to let Charli know if you wish to be named on Native Here's seed collection permits for 2003. E-mail her with your name, address and phone (required for some of the permits) at charlid@pacbell.net.

Margot has a signboard on which native plant designers, gardeners, maintenance folk and restorationists can put their business cards. We enjoy networking with native plant enthusiasts.

Charli Danielson

We should not knowingly allow any species or race to go extinct. And let us go beyond mere salvage to begin the restoration of natural environments, in order to enlarge populations and stanch the hemorrhaging of biological wealth. There can be no purpose more enspiriting than to begin the age of restoration, reweaving the wondrous diversity of life that still surrounds us.

Edward O. Wilson, *The Diversity of Life*

East Bay Chapter Membership Meetings

Upcoming Programs (7:30 p.m. at the Orinda Library):

December, 2002

No meeting (happy holidays!)

January 22, 2003

Ronald Lanner-**Conifers of California**

February 26, 2003

John Game (our very own!) - Topic to be announced

March 26, 2003

Alan Kaplan-**The New Kingdoms of Life**

Sue Rosenthal

Activities of Others

Saturday, December 14, 9:30 a.m.

Fall & Wintering Bird Walk

December is a great time to see both fall and wintering birds at the **Palo Alto Baylands**. **Bay Nature** and the **Baylands Nature Center** are cosponsoring a morning bird walk led by naturalist Deborah Bartens. No reservations required. Heavy rain cancels, and if you have any questions about the weather, please call the Nature Center at (650) 329-2506.

Directions: From Highway 101 (Bayshore Freeway) in Palo Alto take the Embarcadero/East Embarcadero exit. Stay on Embarcadero past Geng, until you reach the "T" intersection, then turn left and follow road to the Center. There is no direct public transit access.

22 **A pot-pourri of paleobotanical discoveries in California and Nevada** - Howard Schorn

The California Botanical Society

2002-2003 lecture series continues

Schedule of Speakers

January 16—*Fire, drought, and the evolution of chaparral shrubs.* David Ackerly, Department of Biological Sciences, Stanford University

February 15—*Annual banquet and biennial graduate student meeting in San Diego Discoveries on a floristic frontier: Baja California,* Jon Rebman, San Diego Natural History Museum

March 20—*The evolution of a specialized pollinator system in southern Africa,* Kim Steiner, California Academy of Sciences

April 17—*Giants in the mist: coastal redwoods and the land-sea interface,* Todd Dawson, Department of Integrative Biology, UC Berkeley

May 15—*Seed dispersal and coexistence of tree species in tropical forests,* Marcel Rejmanek, Division of Biological Sciences, UC Davis

The battle we have fought, and are still fighting for the forests is a part of the eternal conflict between right and wrong, and we cannot expect to see the end of it. . . . So we must count on watching and striving for these trees, and should always be glad to find anything so surely good and noble to strive for.

Field Trips

Sunday, December 8, 10:00 a.m. Barbara Ertter will lead a field trip to the Rock City area of Mt. Diablo State Park. This trip will include late fall color from both oaks and toyon fruits, and possibly some late-flowering tarweeds and early flowering shrubs. Fern gametophytes may also make an appearance, if it rains sufficiently before the trip. East Bay members, please contact Janet Gawthrop at _janetg24@excite.com if you can drive one or more attendees of the state CNPS meeting.

Directions: Take I-680 to El Cerro Boulevard in Danville. Proceed east on El Cerro one mile to join Diablo Road. Proceed east on Diablo Road two miles to Mt. Diablo Scenic Boulevard. Turn left (north) on Mt. Diablo Scenic Boulevard (which becomes South Gate Road) for approximately three miles to Rock City. If the park entry booth is open, there is a \$2 entry fee, so you may want to carpool. If you have questions, call Janet Gawthrop, 654-3066.

Saturday, December 14 10:00 a.m. Dan Norris will take on the bryophytes (mosses, liverworts, and maybe hornworts) of the East Bay hills at Huckleberry Regional Park. First-time bryophyte hunters may want to bring a hand lens, magnifying lens, or photo lens that magnifies close up subjects. If the East Bay has not received rain before this date, a spray water bottle may also be handy. The trip will start at the parking lot for Huckleberry Regional Park, and proceed down to the creek at the section of the Bay Crest trail below the Huckleberry Preserve Loop. This trip may take a half-day, or longer, depending on interest. Only heavy rain will cancel.

Directions: From the north, take the Thornhill Drive exit from 13 and follow Mountain Boulevard south until you reach Snake Road. Take a left onto Snake Road, and all the way up to Skyline. Left on Skyline,

and then look for the signs to the parking lot on the right about ½ mile north. From the south, exit from 13 at the Park Boulevard exit, go north on Mountain Boulevard and then right on Snake Road and follow through as outlined above.

Janet Gawthrop

Photo by John Game. *Fritillaria liliacea* is one of four species in the genus in our two counties. It is a CNPS listed rare plant and is more or less confined to the greater Bay Area. It is seen here on Mount Diablo, on February 25th, 1995, and for lucky visitors it may be one of the early spring rewards of botanizing the mountain in the coming season with the new flora of Mount Diablo, by Mary Bowerman and Barbara Ertter.
