MEMBERS’ MEETING APRIL

A Journey Back in Time on San Miguel Island
Speaker: Bob Sikora
Wednesday, April 26, 7:30 pm
Location: Garden Room, Orinda Public Library (directions below)

Extending west into the Pacific beyond the area sheltered by Point Conception, San Miguel Island has been sheltered from people for decades—by the weather, the Navy, and now, hopefully, by the National Park Service. The island’s isolation has left it as a virtual museum of California geology and archaeology. Bob Sikora has had occasion to visit the island several times, beginning 50 years ago. As you will see, a visit is an experience akin to walking on the moon. He will take us there on April 26.

Bob Sikora (MA, zoology, UC Berkeley) was one of the first four research divers at UC Berkeley. He taught advanced biology at Berkeley High and enjoys nature photography in his retirement.

East Bay CNPS membership meetings are free of charge and open to everyone. This month’s meeting takes place in the Garden Room of the Orinda Public Library at 26 Orinda Way (in Orinda Village). The Garden Room is on the second floor of the building, accessible by stairs or an elevator. The Garden Room opens at 7 pm; the meeting begins at 7:30 pm. Questions? Email programs@ebcnps.org or call 510-496-6016.

Directions to Orinda Public Library at 26 Orinda Way:

From the east, take Hwy 24 to the Orinda exit. Follow the ramp to Orinda Village. Turn right on Santa Maria Way (the first signal) and left on Orinda Way.

Once on Orinda Way, go 1 short block to the parking lot on the southeast side of the two-story building on your right. There is additional free parking beneath the building as well as on the street.

From BART (4 blocks): Exit the Orinda station, turn right and cross a pedestrian bridge, then cross a second pedestrian bridge on the left. Go 1 short block on the sidewalk to the third pedestrian bridge. Go 2 blocks on Orinda Way to the Orinda Library.

Next Month’s Program:

May 24, 7:30 pm, Garden Room, Orinda Public Library
Ted Kipping: Pacific Coast Irises and Their Beautiful Love Children

Thursday, May 4, 2017 is a Big Day of Giving for Sacramento Area non-profits including the California Native Plant Society. See https://www.bigdayofgiving.org/CNPS for information on how to contribute.
CONSERVATION ANALYST’S REPORT

Antioch Residents Turn out for Forum on Sand Creek Housing Development

Over 180 people crowded into Antioch’s Prewett Community Center one night in late February to talk about housing development plans slated for southeast Antioch, south of Lone Tree Way. A large planning area named the “Sand Creek Focus Area” in City planning documents, this four square mile area lies on both sides of Deer Valley Road in southeast Antioch. The Kaiser Center sits inside; the entire planning area stretches lengthwise from slightly east of the hospital all the way over to Black Diamond Mines. Water flows east from the oak woodland foothills of Black Diamond Mines Regional Park and across a broad sweeping valley, then crosses Deer Valley Road. This is Sand Creek, from which the planning area takes its name. (See maps on the next page.)

The forum was organized by Antioch residents, Save Mount Diablo, Sierra Club, Greenbelt Alliance, and the East Bay Chapter of the California Native Plant Society (EBCNPS). EBCNPS is advocating the protection of the rare and unique plant species and communities of Sand Creek. The Sand Creek Focus Area almost fully occupies the “Four Valleys” conservation area from the Chapter’s 2010 publication, “Botanical Priority Protection Areas (BPPA) of the East Bay” (http://ebcnps.org/publications/guidebook-to-botanical-priority-protection-areas/).

Dianne Lake, EBCNPS Unusual Plants Committee Chair, assembled a list of more than 200 rare, unusual and significant native plants likely to occur within the Sand Creek Focus Area. Megan Keever and Nicole Jurjavcic, the Chapter’s Vegetation Committee Co-Chairs, examined the California Natural Diversity Database occurrence records and found several rare natural communities that may occur in Sand Creek Focus Area, such as alkali meadow and seeps, northern claypan vernal pools, and cismontane alkali marsh.

I shared photos of several native plants with the forum audience. Many residents were surprised to learn about the variety and beauty of their natural heritage. Some of these genera have known occurrences within the City of Antioch, commonly encountered on a trail hike. Other pictures showed species that are documented within eastern Contra Costa County, but are rare gems: brodiaea (Brodiaea spp.), calandrinia (Calandrinia spp.), round-leaved flaxee (Caloflorus amsinckiae) and palms, carnivorous plants, cacti and succulents, vines, tropical specimens and more. There is something for everyone at the Spring Plant Sale.

If you have photos or special stories about Antioch’s open spaces and wildflower fields, or wish to keep informed on this issue, please contact me at conservation@ebcnps.org.

UC BOTANICAL GARDEN PLANT SALE

Saturday, April 29, 10 am – 2 pm
UC Botanical Garden Spring Plant Sale

Your Source For Waterwise Plants

Despite the recent rains waterwise gardening in the Bay area is smart and sensible. The Garden offers a wide selection of drought resistant plants from around the world, including an extensive selection of California natives. Shop for exotic, unusual and hard to find plants: rare cycads macrophylla, showy golden madia (Madia radiata), diamond-petaled California poppy (Eschscholzia rhombipetala), small-flowered morning-glory (Convolvulus simulans), adobe navarretia (Navarretia nigelliformis spp. nigelliformis) and various fiddleneck (Amsinckia spp.) with attractive caterpillar-shaped inflorescences. The area also includes potential habitat for rare large-flowered fiddleneck (Amsinckia grandiflora), and recently rediscovered Mt. Diablo buckwheat (Eriogonum truncatum).

Ending the slideshow, I recounted a few local native plant protection successes, including preservation of rare Antioch Dunes evening primrose (Oenothera deltoides spp. howellii), and Antioch Dunes buckwheat (Eriogonum dudum var. psycholica).

The City is still proposing to allow the building of up to 4,000 housing units in the Sand Creek Focus Area. Of particular concern is a development named “The Ranch,” up to 1,300 houses in almost one third of the Sand Creek Focus Area between Empire Mine Road and Deer Valley Road. If constructed, the Ranch project could stimulate even more development along its outskirts.

Public concern is growing, and residents are telling the City that the planning area for housing is too big, with too many houses. Residents at the forum expressed concern about added traffic delays, neighborhood safety, loss of focus away from other revitalization plans, and of course, loss of a beautiful open space. The organizations involved support more community workshops, a full EIR, and an alternative that shrinks the Urban Growth Boundary (aka, Urban Limit Line). Stimulated by the February forum turnout, City officials scheduled two “Listening Forums” in late March. Most importantly, residents at all these forums are loudly voicing their desire to keep some of the area’s natural beauty and see Antioch fix its other issues before adding large housing developments.

Great Advice and Guidance

The UC Botanical Garden’s expert staff and volunteers take pride in the plants we grow and propagate. We’ll be here to answer questions, give advice, and talk all things plants. http://botanicalgarden.berkeley.edu/springplantsale/
Join the City of Fremont’s Environmental Services to enhance wildlife habitat along Sakerect Creek. We are holding volunteer work days on the first Saturday of each month from 9 am-12 pm. With the recent rains, the soil is moist and soft, perfect for removing invasive plants, planting new native trees and shrubs, and caring for previously planted ones. Our work will help stabilize soils and creek banks, filter pollutants, increase native plant diversity, and improve food and shelter for wildlife.

Saturday, April 1, 2017, 9 am-noon Sakerect Creek Habitat Restoration, Site 5 (Becado Place)  
Saturday, April 15, 9 am-noon Celebrate California Native Plant Week with Habitat Restoration at Sakerect Site, 4 Enter at the trailhead at Quema Drive and Paseo Padre Parkway, go down the slope, go to the main trail and turn left (head east) through the cattle gate. Look for browse protection cages to your right.

Registration is required. Please visit www.fremont.gov/SakerectRestoration. Click on the “Eventbrite” hyperlink to find the pages for upcoming events. Heavy rain cancels the event. No experience is necessary. All ages are welcome, but children under 12 must be accompanied by an adult.

Come dressed for the weather and prepared to get dirty (sturdy closed-toe shoes/boots, long pants, hat, sunscreen, and water). Bring a signed waiver of liability in case of an accident.  

For more questions or comments, please contact Sabrina Siebert at ssiebert@fremont.gov or call 510-494-4570.

See you there!

RESTORATION PROJECTS

Native plants. A map of the area can be found at https://goo.gl/rdpZQW. For directions to the work site or more information about this project, contact John Kenny (johnkenny54@yahoo.com).

Saturday, April 8, 9:30 am, Huckleberry Regional Botanic Preserve (only entrance on Oakland, at the right of Skyline Boulevard)  
Meet the ranger at the parking lot to pick up gloves, water, and tools and decide on a worksite. Now that some of the French broom is gone we’ve started pulling Italian thistles and poison hemlock that sprung up this year. If you have questions or want to volunteer on a different date please e-mail janetgawthrop47@gmail.com.

Sunday, April 9, 9:30 to 1 pm, Redwood Regional Park  
Meet at Canyon Meadow picnic area to pull French broom.  
See April 1 description.

Saturday, April 15, 9 am, Pt. Isaac at McLachlan Estate  
Meet at the end of Rydin Road to pick up tools and find a site in need of weeding. 
E-mail kyotousa@sbcglobal.net to RSVP and if you have any questions.

Saturday, April 15 10 am-1 pm, Garber Park  
Come join Garber Park Stewards and Lech Namovich, Golden Hour Foundation, to learn about the invasive species and the science behind them. We will walk off trail and survey the entire 13 acre park using a systematic grid, removing any broom we find. Join us on our first annual “sweep” through the park to keep Garber French broom free. Wear long sleeves and pants, and shoes or boots with good treads.

We provide tools, gloves, water, and snacks. Directions: can be found at garberparkstewards.org.  
RSVP to Shelagh garberparkstewards@gmail.com.

Sunday, April 16, 9am, Sibley Regional Park (Oakland entrance)  
Meet us at the parking lot off Skyline, a few hundred meters north of Huckleberry Park. However if you want to start in from the Old Tunnel Road staging area (Orinda side), then e-mail either janetgawthrop47@gmail.com or sibley@ebparks.org. 
So we can expect you. We have made enough of a dent in the wall of French broom to move back a short distance from the Sibley to Tilden trail.

Saturday, April 22, 9 am, Beaconsfield Canyon in Oakland  
Celebrate Earth Day with the Friends of Beaconsfield Canyon as they restore this riparian area complete with a couple of the few Fremont poplars in the East Bay. (Fremont cottonwoods) 
North of the parking area is limited, so it is best to scope the area ahead of time. Google maps works, as does the Friends of Beaconsfield contact.

Saturday, April 29, 9:30 am, Albany Hill, 9:30 am, Mariposa & Others  
Join Margaret other invasives from around the native plants. A map of the area can be found at https://www.gardenersworld.com/activities.html. 

RESTORATION PROJECTS CONTINUED

Citizen scientists needed for endangered pallid manzanita (Arctostaphylos pallida) crew

Are you intrigued by scientific field methods? Do you love being outdoors? Does a gorgeous manzanita stop you in your tracks? Friends of Sausal Creek is excited to be partnering with the California Native Plant Society and the Chabot Space and Science Center to increase plant identification skills, monitor the probability of its eradication. Due to the work of dedicated volunteers over many years French broom is nearly eradicated at Garber. We will be walking off trail and surveying the entire 13 acre park using a systematic grid, removing any broom we find. Join us on our first annual “sweep” through the park to keep Garber French broom free. Wear long sleeves and pants, and shoes or boots with good treads.

For more questions or comments, please contact Sabrina Siebert at ssiebert@fremont.gov or call 510-494-4570.

For large-scale garden inspiration, there is a great article about Dennis Mudd, a San Diego gardener who invented the tool. The article includes before and after pictures. https://growvatives.cnps.org/2016/12/san-diego-garden-tour-with-calscape-creator-dennis-mudd/  
Happy filtering!

Kirsten Hopper  
Oaktown Native Plant Nursery
POINT ISABEL RESTORATION IN MARCH 2017

This Point Isabel Restoration Project article is dedicated to all our volunteers, both current and past, without whom we could never have accomplished much nor could we have been able to maintain our own commitment to making Hoffman Marsh the best habitat possible.

Since getting under way nearly a decade ago we have had thousands of volunteers participate in the restoration effort. In the early years volunteers pulled out hundreds of tall, invasive French broom shrubs, moved mulch, eliminated Cape ivy, ice plant (well, as long as you don’t look at the I-580 embankment), thistle, radish, mustard and more. Daisy Scouts, Eagle Scouts, schools, churches and synagogues, office workers, and more are taking part.

Just this month we welcomed 30 volunteers at the work party on March 4. English Studies Institute (ESI) students from Japan, CorePower Yoga teachers-in-training from the Bay Area, Point Isabel Stewards and Core Volunteers. We mixed up the groups to help the ESI students learn many new English words. Pulling oat grass and oxalis, sheltering beetle cocoons and spiders. Learning how to say to the little creatures “See You Later, Alligator” and learning the correct response of “After a While, Crocodile”. Inspecting the California native plants - poppies, toyon, California sage brush, lizard tail, monkey flowers and bunch grasses. Shore birds fed everywhere, including great blue heron, egrets large and small, willets, ducks, butterflys and geese. Both groups did a tremendous weed removal job and CorePower Yoga teachers-in-training stepped up and helped an ESI student stretch to relieve a leg cramp.

On March 6 we worked with Steward Margot to start replanting the Adopt-a-Spot that had been erroneously mowed by Caltrans. We settled in a five-gallon buckeye (Aesculus californica) as well as pink flowering currant (Ribes sanguineum var. glutinosum), red willow (Salix laevigata), toyon (Heteromeles arbutifolia), big saltbush (Atriplex lentiformis), California phacelia (Phacelia californica), and sticky monkeyflower (Mimulus aurantiacus). Margot found the young buckeye that had been mowed to the ground but that is beginning to grow again. At the end of March Margot will supervise an Eagle Scout candidate who will remove invasive grass and complete the replanting of this site.

Just this month we welcomed 30 volunteers at the work party on March 4. English Studies Institute (ESI) students from Japan, CorePower Yoga teachers-in-training from the Bay Area, Point Isabel Stewards and Core Volunteers. We mixed up the groups to help the ESI students learn many new English words. Pulling oat grass and oxalis, sheltering beetle cocoons and spiders. Learning how to say to the little creatures “See You Later, Alligator” and learning the correct response of “After a While, Crocodile”. Inspecting the California native plants - poppies, toyon, California sage brush, lizard tail, monkey flowers and bunch grasses. Shore birds fed everywhere, including great blue heron, egrets large and small, willets, ducks, butterflys and geese. Both groups did a tremendous weed removal job and CorePower Yoga teachers-in-training stepped up and helped an ESI student stretch to relieve a leg cramp.

On March 9 we planted six more yampah (Perideridia kelloggii) on Steward Tom’s site to create a good patch for the anise swallowtail caterpillars.

On March 18 we had our 2nd work party with Stewards, Core Volunteers, and new volunteers Matt and Charlotte and spent a serene and very productive day removing oat grass, oxalis, thistle, dandelion and California burclover (not native, despite its common name). Core Volunteer Rob Kirby picked up all the trash along the trail preventing any of it from reaching the marsh.

Thanks to EBRPD Recreation Supervisor Jeremy Saito for the bandanas and hats. Thanks as always to our District Ranger, Bruce Adams.

March 4 crew (previous page), Core Yoga volunteers (upper left), Berkeley High volunteer Charlotte (upper right), Gudrun with ESI students (below). Photos by Jane Kelly.
NATIVE HERE WATERING TEAM NEEDED

Join the watering team and save lives — plant lives!
Native Here Nursery (shown below) is in need of a few more watering team members. We have watering slots available on Fridays, Saturdays or Sundays. If you like solitude you can water when the nursery is closed. If you prefer the fellowship of volunteers doing a variety of activities, we have slots to fill while the nursery is open.

We depend entirely on volunteers to keep the nursery going, and there are ways for volunteers with many backgrounds and skills to be involved.

For more details on how you may become involved with the nursery see http://nativeherenursery.org/volunteer-opportunities/ or email the Volunteer Coordinator at rapearsons1@mac.com, East Bay CNPS Native Here Nursery.

GOLDEN HOUR INSTITUTE EVENTS

On April 10, the Golden Hour Institute is having a workshop for five people to learn QGIS - a fantastic free GIS platform. This workshop is intended for beginners who want to find out how to use open source Geographic Information Systems software and some basic functions around using it. Note, space is limited to five - you must buy a ticket here: https://introtoqgis-goldenhour.eventbrite.com

This workshop will be conducted indoors at the David Brower Center – 2nd Floor conference room – 2150 Allston Way Berkeley, CA. Cost: $35, light evening snacks provided.

We depend entirely on volunteers to keep the nursery going, and there are ways for volunteers with many backgrounds and skills to be involved.

In April the Institute plans to have a rare plant workshop on taking a census of an endangered annual plant.

FIELD TRIPS

April 1-6
Death Valley, Amargosa and Panamint Ranges botany trip
April 8
Toyon Canyon April 8
https://www.meetup.com/ebcnps/events/235194203/
April 15-20
Joshua Tree National Park Botany trip
April 29-May 8
Mojave National Preserve 8 day trip

As part of the year-long celebration of the 10th Anniversary of the East Contra Costa County Habitat Conservancy’s work, the Conservancy and East Bay Regional Park District are hosting a series of hikes on properties that have been acquired and have not yet opened to the public. Save Mount Diablo, Nomad Ecology, and the California Native Plant Society-East Bay are partnering with the Conservancy and EBRPD to lead hikes. The hikes for April and May are listed below.

Explore Horse Valley (Roddy Ranch) - South Antioch Area
Saturday, April 9, 9:30-noon
Monday, April 10, 9:30-noon
Participants must register in advance. The registration link to the hike is here: https://www.eventbrite.com/e/explore-horse-valley-roddy-ranch-tickets-32179453612
Hosted by the Conservancy and Nomad Ecology.

Exclusive Irish Canyon Property Tour - Clayton Area
Saturday, May 13, 9 am-1pm
Participants must register in advance at: https://irish-canyon-property-hike.eventbrite.com
Hosted by Save Mount Diablo, this docent-led hike will be on:
Abigail Fateman
Phone: (925) 674-7620
Email: Abigail.Fateman@dcd.cccounty.us

Sunday, April 23, 9:30 am, field trip to Richmond Hills Join Dick Schneider and Janet Gawthrop for this beginner-level walk into the Richmond Hills, starting from the Clark-Boas trailhead. This trip will focus on the mixed grasslands and conservation election victory last year, in which voters saved this open space adjoining East Bay Regional Parks. If you have a grass key that you want to learn to use, bring it along. This is a good place to learn keying grasses in the field, if you don’t mind staying on in the middle of the day. You can RSVP either by e-mail janetgawthrop47@gmail.com or go to www. meetup.com/ebcnps/.

WORKSHOPS BY OTHER ORGANIZATIONS

Workshops at the Ruth Bancroft Garden

The Garden will host monthly free all-day events featuring different themes that relate to sustainable gardening practices. Here are the themes for upcoming Waterwise Wednesdays:

Wednesday, April 12: Expert Advice for Drought Tolerant Garden. Learn the best practices and “how to’s” of converting a traditional lawn to a vibrant drought tolerant garden
Wednesday, May 10: Making and Using Compost. In conjunction with International Compost Awareness Week, come learn how to make and use compost—the secret ingredient for improving your soil and invigorating your plants.
Wednesday, June 14: Birds, Bats and Other Pollinators. Welcome birds, bats and other important pollinators into your garden. Find out how to choose plants that will provide food and habitats for wildlife.
Wednesday, July 12: Insect Friends and Foes. Learn about organic methods of pest control including how to cultivate beneficial insects and identify garden pests.
Wednesday, August 9: Reduce, Reuse, Recycle Water in the Garden. Learn how to set up water conserving drip irrigation systems, harvest rainwater or set up a grey water recycling system in your garden.
Wednesday, September 13: Native Plants. Plants that are adapted to our climate and soils thrive in garden settings and require much less supplemental watering. Fall is the perfect time for planting native plants! Learn from experts about designing and choosing plants for your water-wise garden.

Mono Lake Workshop on High Country Plants and Habitats

July 28-30, Friday-Sunday, 2017
Instructor: Ann Howald
Cost: $165 per person, $150 for Mono Lake Committee members, limited to 15 participants

Taught in the Tioga Pass region of the Sierra Nevada, this field seminar visits subalpine meadows, forests, lakeshores, streams, and natural rock gardens. Field identification of trees, shrubs, wildflowers, and ferns, resident birds, insects and other wildlife combines with discussions of how these plants and animals rely on each other for food, seed distribution, nesting sites, and other necessities. A special focus is how high elevation plants and animals are being affected by climate change, and how they are coping with “weird weather” and other new realities.
For detailed information, please visit: http://www.mono lake.org/visit/seminars
